

...→→→ **DICOM COMPLIANT**

The ideal storage and/or circulation solution for medical images, patient records, back-ups and archives.

...→→→ **SCRATCH RESISTANT COATING**

FalconMedia's proprietary technology for a scratch resistant surface coating, "UHC", is the most reliable solution to protect your mission critical data against potential surface damages due to mishandling. The reading surface resistance to accidental damages is increased by 100 times when compared to standard media in the market.

- Manufactured under ISO:9001 and ISO:14001 quality and environment management systems in a swiss managed plant.

Medical Grade

FalconMedia products are proposed in a large variety of printable surfaces optimized to get full color high resolution photo quality printing with the most popular professional printers of the market. Inkjet printable layer is showing excellent printing performance in terms of resolution, ink absorption and drying time with Rimage, Primera, MicroBoards, Epson, etc inkjet systems.

Thermal printable layer has been optimized for Rimage Everest and TEAC printers.

A universal solution is also available to match both requirements of thermal and inkjet printing: The Smart White printable layer. This unique universal layer is showing outstanding results with any inkjet printer as well as with thermal printers from Rimage (Prism and Everest II).

Available in 4 types of disc labeling surfaces, compatible with most DICOM Disc publisher systems.
